

Central Coast Marine Discovery Centre

School Programs 2016

The Central Coast Marine Discovery Centre (CCMDC) offers a range of excursions to primary and secondary students in 2016. We provide engaging excursions where your students will gain hands on experience, collect first hand data and explore the wonders of our coastal & marine environments. A typical program runs from 9:30am to 2pm.

Primary Programs - The following programs are based on syllabus outcomes and can be related to either H5IE or Science & Technology. The focus of our primary programs is to engage students with the marine environment and foster an understanding of their importance and the need for protection.

Secondary Programs - Our Secondary Programs are based on syllabus outcomes in both Science and Geography. Students will gain invaluable field skills as they study our local ecosystems.
